

Cloud Computing

About our cloud solutions

Operate your IT infrastructure on the secure Interlinked Cloud, and access your business 24/7 from anywhere in the world.

Our tailored services and enterprise-grade cloud infrastructure ensure that your priceless business data is kept safe, secure, and backed-up. Your team will also enjoy extra convenience and flexibility with everywhere access at any time.

The Interlinked Cloud also offers you the opportunity to take advantage of IT as a "utility". You only need to pay for what you use, removing the burden of expensive upfront investments and costs of managing and maintaining IT infrastructure.

Let us assist you with a customised cloud computing strategy that will work best with your organisation.

Benefits of our services to your business

- ✓ Cost savings by only paying for what is needed rather than investing capex into infrastructure
- ✓ Predictable monthly billing model
- ✓ Scalability allows for business agility and seamless growth
- ✓ Increased efficiency by freeing up resources to focus on business activities
- ✓ Utilise the latest technology in familiar working environments
- ✓ All data housed securely in local data centres within Sydney with 99.9% network performance

Scope of our services

Cloud Servers

Host your important business data on our secure enterprise-grade servers - you can choose to manage your own server or have Interlinked do it for you.

Remote Desktop

Avoid costly desktop deployments, software installation, and backups. Host your desktop in the Interlinked Cloud, login from anywhere, and start working.

Application Hosting

Access and use both off the shelf or tailored applications hosted securely in the Interlinked Cloud through any device with an internet connection.

Email Solutions

Emails and calendar invites are synced across all connected devices with our hosted email solutions, so your team can communicate from anywhere any time!

Enterprise Mobility

We provide your mobile employees the tools they need to handle critical tasks securely and make informed business decisions in real time.

Other Cloud Services

Interlinked's secure Cloud infrastructure allows you to deploy customised business solutions as you require them, efficiently, effectively and hassle-free!
