

# Software Development

interlinked

## About our development solutions

---

**Have an idea or a problem but not sure where to start? Interlinked provides high quality and reliable solutions to all your custom business needs.**

Our experienced development team takes the time to understand what you aim to achieve, so that we can design a product that is the perfect fit for your team, systems, customers and all other stakeholders.

With all development projects our core focus is on solving problems innovatively to enhance your business processes. We keep you updated along the way, providing visibility of progress and keeping projects on track, on budget and to your specifications.

As a Microsoft Gold Certified Partner, we also utilise Microsoft products to provide a range of development solutions for powerful business integration.

## Benefits of our services to your business

---

- ✓ Developed specifically for the unique situation of your business and staff
- ✓ Solutions to problems and functionality that you cannot obtain from off-the-shelf products
- ✓ Increased efficiency and productivity through streamlining processes
- ✓ Cost reductions from higher efficiency and eliminating licensing fees
- ✓ Customisable solutions allows for innovation in your business processes
- ✓ Solution is built directly from your input meaning you are not paying for things you do not need

```
Update-SQLdbowner -SourceServer $sourceServer -DestinationServer $destinationServer -DatabaseName $dbname -Username $username -Password $password ($result) { Add-Content -Path "$scriptName-$dbname.txt" -Content "Database $dbname updated successfully." } } else { $skippedb[$dbname] = $result } if ($ReattachAtSource) { $null = ($sourceServer.databases | Where-Object { $_.Name -eq $dbname }) $result = Mount-SQLDatabase -Server $sourceServer -Database $dbname -Username $username -Password $password $result -e
```

## Scope of our services

### SharePoint

We develop custom tools for SharePoint to enforce synergy, allowing your business to enhance teamwork, discover people and make informed decisions.

### Web Applications

Custom software designed to run on web browsers, allowing cross-platform compatibility and removing the need to distribute and install on each computer.

### .NET

The .NET Framework allows us to design and build custom applications with visually stunning user experiences and seamless & secure communication.

### CRM

Organise and automate business processes to nurture customer loyalty, deliver ROI through sales & marketing automation and customer service.

### SQL

Let us migrate and enhance existing server databases, optimise performance, integrate multiple databases or design and develop all new ones.

### Other Solutions

Our experienced team of developers have a diverse set of skills, simply let us know your business needs and ideas and we will make it a reality.
